

# Assignment 8: Agent-Based Models

MinJae Jo

2025-10-16

## Exercise 1

```
if (file.exists("results_ex1.rds")) {  
  results_ex1 <- readRDS("results_ex1.rds")  
} else {  
  results_ex1 <- run_abm()  
  saveRDS(results_ex1, "results_ex1.rds")  
}
```

- i. S, I, R
- ii. population\_size = 100
- iii. time\_steps = 50

## Exercise 2

```
library(ggplot2)  
  
ggplot(results_ex1, aes(x = time)) +  
  geom_line(aes(y = S, color = "Susceptible")) +  
  geom_line(aes(y = I, color = "Infectious")) +  
  geom_line(aes(y = R, color = "Recovered")) +  
  labs(  
    title = "SIR Agent-Based Model Simulation",  
    x = "Time (days)",  
    y = "Number of People",  
    color = "State"  
  ) +  
  theme_minimal()
```
